
Education

Access to Higher Education – Science

September 2021 – July 2022

- Biology, Chemistry, and Physics (45 Level 3 credits at Distinction grade, equivalent to 144 UCAS tariff points or an A level grade set of AAA).

A-Level

June 2017

- French (C).

GCSEs

August 2015

- Mathematics (C), English Literature (B), English Language (B), Science (B), Additional Science (C), Geography (C), Spanish (C), and French (A).

Employment

Stylist (D.C. Thomson)

14 July 2025 – 01 August 2025

Junior Frontend Engineer Work Experience

- Took initiative in my free time by investigating and resolving a CSS bug in an existing Next.js codebase that affected the functionality of the application's light/dark themes.
- Built a responsive, reusable, and accessible social media UI component from Figma design specifications, integrating live data from a headless CMS. Demonstrated strong time management and attention to detail by repurposing the component for related tickets to increase efficiency.
- Strengthened my technical skills and knowledge of modern software delivery and development practices using technologies including Next.js/React, TypeScript, CSS, GraphQL, and Docker to deliver clean and maintainable code.
- Engaged in Agile ceremonies to help translate stakeholder requirements into product features, clearly communicate my contributions, and actively listen and incorporate feedback from the development team.

CCW Secretarial Services

April 2017 – April 2021

Medical Administrative Assistant

- Used a strong customer-first mindset to handle sensitive patient queries with discretion and professionalism and resolved complex situations calmly and effectively to build trust and maintain a high standard of service.
- Communicated and collaborated with team members to support high-priority tasks in response to business demands, demonstrating flexibility and problem-solving to ensure smooth operations and uphold customer experience.
- Performed IT tasks such as troubleshooting medical software issues on the office computers and liaised with the development team for the practice management system.

Skills

Soft Skills

- Continuous and quick learning
- Problem-solving
- Curiosity
- Collaboration
- Accountability
- Communication

Technical Skills

- **Frameworks and Libraries:** Next.js, React, Flask
- **Programming Languages:** TypeScript, JavaScript, Python, SQL
- **Tools:** Git/GitHub, Docker
- **Other:** HTML, CSS

Personal Project

UK Bird Sightings and Traits Web Application

GitHub Repository: <https://github.com/cascabeanie/local-avians>

Live Project: <https://local-avians.vercel.app/>

- Researched and planned an educational resource for bird sightings across UK counties, including cleaning and manipulating open-source bird trait and sightings datasets with the Pandas Python library and creating UI designs with Figma to outline the CSS styles used in the frontend.
- Built the frontend with React (TypeScript), incorporating the D3.js library to create a fully interactive map of the UK that allows users to easily find results for their local county and the Recharts library to create interactive data visualisations to summarise key traits.
- Built the backend with Flask (Python) to handle incoming HTTP requests and retrieve necessary bird trait and sightings data from the SQLite database before serving the responses as JSON to the frontend via API endpoints.
- Designed a relational SQLite database schema to organise bird data, using primary and foreign keys to establish relationships and SQL joins to efficiently perform a range of queries for filtering and manipulating data across interconnected tables.
- Strengthened my technical, resilience, and problem-solving skills by successfully resolving bugs and overcoming knowledge gaps to build a fully functional and modern full-stack application.
